

# Select Entry Accelerated Program

## Springside West Secondary College

### Curriculum Pathway

At SWSC, students entering the SEAL program engage in a curriculum program which is based upon the standard mainstream coursework and essential knowledge and skills. Throughout the course of each year, students are engaged in a range of programs which subsequently enhance this curriculum. These activities and lessons range from in-depth research tasks, complex problem-solving activities, as well as advanced writing and analysis tasks. In the area of Italian, students undertake a more rigorous and accelerated learning program, engaging in a wider variety of cultural and linguistic activities. In the area of Mathematics, students undertake a fully-differentiated online program allowing them to accelerate through the Year 7-10A curriculum at their own pace. Scope and Sequence
