

Select Entry Accelerated Program

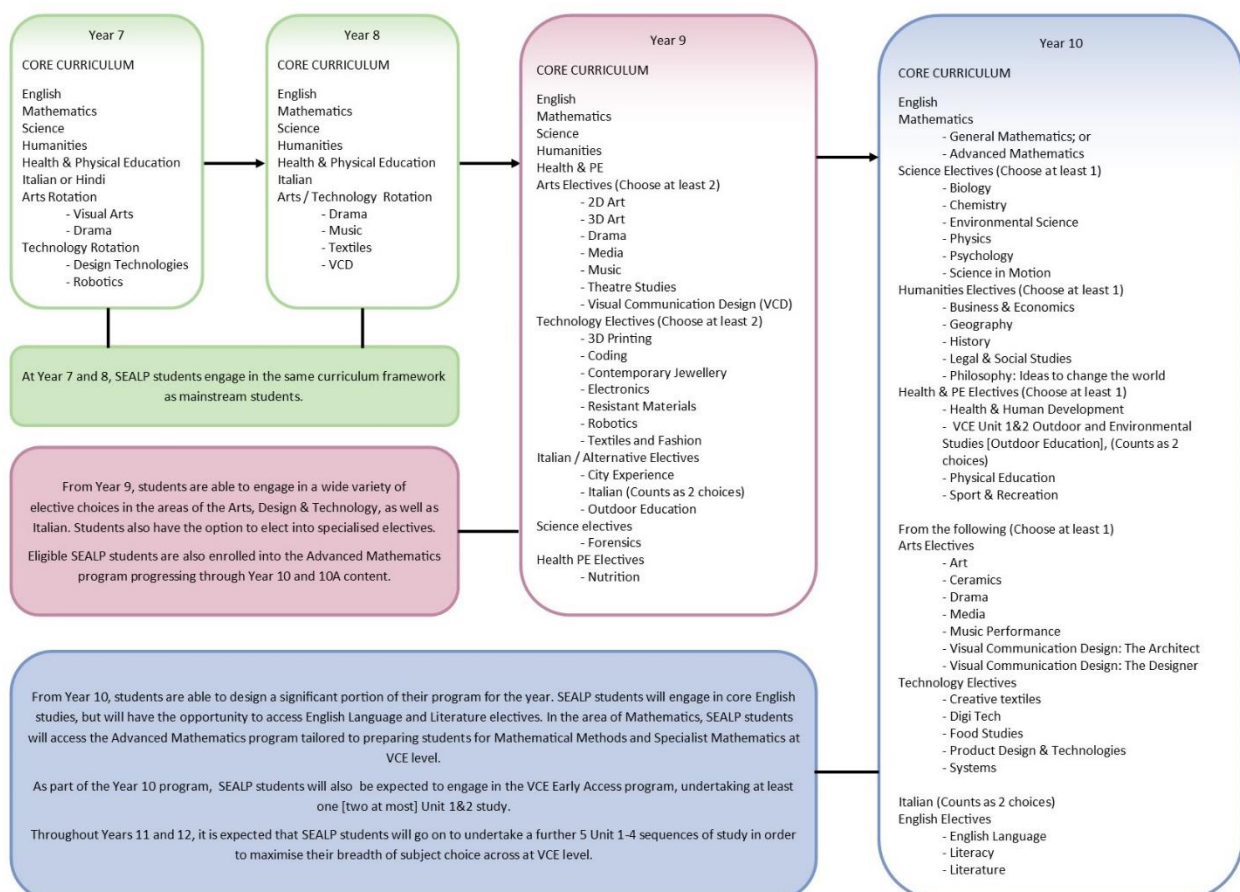

Springside West Secondary College

Curriculum Pathway

Students enrolled in the SEAL program at SWSC follow a curriculum that builds upon standard mainstream coursework while focusing on essential knowledge and skills. Throughout each academic year, students participate in various programs that complement and enrich this curriculum. These activities include in-depth research tasks, complex problem-solving activities, and advanced writing and analysis tasks.

In the Language domain, students engage in a more intensive and accelerated learning program that encompasses a wide range of cultural and linguistic activities. In Mathematics, students have access to a fully differentiated online and traditional textbook program, enabling them to progress through the Year 7-10A curriculum at their own pace. These preparations lay the foundation for them to embark on a three-year VCE program with a diverse selection of subjects, ultimately positioning them for a higher ATAR score.
